Careers

Last updated: October 2026

aurumbeam is the brand and the infrastructure of Aurumbeam London Ltd, which has its registered office in London. We are building an application through which people can buy physical gold, have it held in custody, transfer it within the aurumbeam infrastructure and sell it, in amounts from ten euros. In the product presentation, the transfer of gold holdings is called beaming.

What this means for the work

We work on a product in which errors directly affect customers' money and property. An incorrect register entry is not a cosmetic defect. This determines how we work:

- Traceability before speed. Every change of state is logged; corrections are made by means of a reversing entry, not by overwriting.
- Regulation is not a downstream review step but part of the product decision.
- Texts that customers read are part of the product and are built with corresponding care.

Areas

Technology. Backend and register logic, mobile applications for iOS and Android, web application, server operations and security, payment integration and identification processes.

Compliance and Legal. Prevention of money laundering, sanctions screening, review of customer transactions, contractual framework, regulatory matters in the target markets.

Operations. Custody, reconciliation of holdings, delivery and logistics, cooperation with the custodian in Vienna and with shipping service providers, processing of purchases of precious metals sent in.

Customer Service. Enquiries and complaints in German and English, analysis of recurring causes, contributing to help texts.

Product and Design. Processes in the app, clarity of prices, states and risk disclosures, accessibility.

Finance and Trading. Pricing, hedging, liquidity, reporting.

What we expect

- You can explain why you built or decided something the way you did.

- You say so when something is not working or when you have made a mistake, and you do so early.
- You work carefully in writing. In a distributed team, written clarity is the foundation.
- Confident command of German or English, spoken and written; depending on the role, both.

For roles with access to customer data, to register functions or to holdings, an identity check and, depending on the position, further evidence of reliability are required. All staff are bound to confidentiality and to the internal policies.

What we offer

- A product with a clear subject matter and measurable results.
- Short lines of communication. There is no department standing between you and a decision.
- Support for professional development, in particular in the areas of compliance, security and law.
- Location-flexible working, insofar as the role permits. Roles with access to holdings or to the register are subject to additional requirements regarding working environment and device security.

Equal treatment

We make decisions on recruitment, remuneration and development according to suitability, ability and professional performance. Origin, nationality, sex, age, religion or belief, disability, sexual identity and marital status play no part in this. If you need an adjustment during the application process, let us know and we will arrange it.

Application

Send the following to karriere@aurumbeam.com:

1. a short message explaining why this role and why aurumbeam,
2. your CV,
3. for technical roles, examples of your work, where available.

We do not need template cover letters. We prefer three honest paragraphs to two pages of boilerplate.

Process. Acknowledgement of receipt within a few days. A first conversation of around thirty minutes. Then a technical interview, depending on the role with a concrete task that is based on actual work and requires a manageable amount of time. A final conversation about terms. We give feedback at every stage, including in the case of a rejection.

Speculative applications are welcome. Please state which area you have in mind.

Data protection in the application process

We process your application documents exclusively for the purpose of conducting the application process. The legal basis is Article 6(1)(b) UK GDPR and, where applicable, Article 6(1)(b) GDPR, in each case in conjunction with the rules on data processing in the employment context.

After the process has been concluded, we delete the documents as soon as they are no longer needed and no statutory retention or evidential obligations preclude this. If you would like us to retain your documents for future positions, please let us know. We will then store them on the basis of your consent, which you may withdraw at any time.

Your rights as a data subject and the contact details for data protection enquiries are set out in the Privacy Policy. Please send enquiries to datenschutz@aurumbeam.com.

Notice on recruitment fraud

We never ask applicants for payments, advance fees, deposits or access to bank accounts, and we do not conduct interviews in which money is requested. Messages containing such demands do not come from us. Please report them to support@aurumbeam.com.
